

## School of Obstetrics and Gynaecology

### List of Essential and Desirable Courses based on curriculum 2018/2019

Please note:

Many of these courses are supplied in-house at a much lower cost and it is expected that trainees would attend these in preference to external courses. However, if this is not possible there is a reciprocal arrangement with Wessex Deanery. If neither of these options are possible, it is sometimes necessary to attend an external course and study leave funding will be approved providing the Educational supervisor/College tutor is supportive.

### Specialty Courses

| Course title                               | Stage       | Oxford Deanery Course | Other provider  | Maximum cost  | Desirable or Essential |
|--|-------------|-----------------------|---|---|------------------------|
| Part 1                                     | ST1/2       | No                    | RCOG / various  | £500 +VAT   | Desirable              |
| Part 2                                     | ST3-5       | No                    | RCOG/ various   | £500 +VAT   | Desirable              |
| Part 3                                     | ST3-5       | No                    | RCOG / various  | £500+VAT  | Desirable              |
| Basic practical skills                     | ST1         | No                    | RCOG  | £675  | Essential              |
| CTG training                               | ST1/2 + all | YES                   | K2 / RCOG e-learning for health   | Free  | Essential              |
| Obstetric simulation course                | ST1/2       | YES                   | PROMPT/ALSO   | £395  | Essential              |
| Basic ultrasound course                    | ST1/2       | YES                   | RCOG/Various  | Deanery 4 day blended course £400<br>Various up to £800 | Essential              |
| USS theory                                 | ST1/2       | YES                   |   | Free  | Essential              |
| 3 <sup>rd</sup> Degree tear course         | ST1/2       | No                    | E.g. Croydon University Hospital third and fourth degree perineal tears and episiotomy Workshop | £310 with textbook and DVD                              | Essential              |
| Resilience course (Step Up)                | ST1/2       | YES                   | Wessex  | Free  | Essential              |
| ROBUST operative birth simulation training | ST1-3       | YES                   | RCOG/various  | £250  | Essential              |

|                                  |                    |     |  |                |           |
|----------------------------------|--------------------|-----|--|----------------|-----------|
| Leadership and management course | ST6/7              | YES | Nuts and bolts plus Deanery management course<br>Also RCOG / various | Approx £550    | Essential |
| Educational supervisor training  | ST6/7              | YES | Wessex   | Free           | Essential |

| Intermediate USS course          | ST3-7              | YES | RCOG / various   | D/W Miss Reddy |           |
| GIC instructor course            | ST6/7 (invited)    | NO  | ALSG   | £500           | Desirable |
| Leadership academy               |                    | YES |  | Free           | Desirable |

### ATSM courses\*

| ATSM course   | Provider(s) | Cost |
|---|-------------|------|
| ATSM – Benign abdominal surgery / advanced laparoscopy  | RCOG        | £420 |
| ATSM – Acute gynaecology and early pregnancy            | RCOG        | £420 |
| ATSM – Advanced antenatal practice                      | RCOG        | £525 |
| ATSM – Advanced labour ward practice / labour ward lead | RCOG        | £616 |
| ATSM – Benign gynaecological surgery                    | RCOG        | £420 |
| ATSM – Fetal Medicine                                   | RCOG        | £525 |
| ATSM – Maternal Medicine                                | RCOG        | £420 |
| ATSM - Menopause  | RCOG        | £420 |
| ATSM – Urogynaecology and vaginal surgery               | RCOG        | £420 |
| ATSM – Subfertility and reproductive health             | RCOG        | £625 |
| ATSM – Abortion care                                    | RCOG        | £225 |
| ATSM – Medical education                                | RCOG        | £420 |
| ALWP workshop advanced techniques                       | Deanery     | £100 |

\*Trainees are required to complete 2 out of 19 ATSM modules in ST6/7. Only the ATSMs with mandatory courses are listed above. The course fees for the ATSM courses are in addition to the advanced training fee.

## Other Mandatory Expenses

| Specialty                                  | Course title and/or course assessment | Maximum cost*  |
|--|---------------------------------------|--|
| Presentation outside own local dept by ST4 | ST4                                   | Depends on conference/meeting attended e.g. BMFMS 2017 £495 registration fee, RCOG world congress 2017 £512 registration fee |
| GMC standards of clinical supervisor       | ST6/7                                 | Provided by deanery free of charge   |
| Attendance at regional teaching            | ST1-7                                 | See footnote**   |

\*Giving a presentation at one meeting outside of a local department is mandated once in the course of training and the cost given is representative of this. Most trainees attend at least one conference per year/alternate years. (Desirable)

\*\* The cost of regional training varies significantly. There is local variation as to how this is paid for. HEE TV does not top-slice the cost of regional training from trainee study budget (unlike many other deaneries) but for specialist courses, particularly franchised courses, trainees will have to pay for training events individually.

## Subspecialty training

There are four subspecialty programmes within O&G. The annual registration fee is £134, with an additional £176 for the first year. Subspecialty programmes can be either two or three years. Each of the four subspecialties requires attendance at mandatory courses. The cost for these varies and are not within the scope of this report. 4 Sub Specialties • Gynaecology Oncology • Maternal-Fetal Medicine • Reproductive Medicine • Urogynaecology
