

Optimising Educational Outcomes

ST1 INDUCTION

Dyslexia Screening - Why?

Up to 10% of doctors in post-graduate training may have dyslexia

Early screening and evaluation may increase your chances for exam success

Help and adjustments in the workplace

Help and adjustment with exams

Overlap with other neurodiversities – Support is available

Important to remember

Identification of dyslexia is NOT an indication of clinical incompetence or lack of knowledge

Very bright and highly competent healthcare professionals can struggle with passing postgraduate exams due to previously unidentified dyslexia

Next Steps

Complete screening questionnaire

Results will be processed

You will be emailed your result and next steps for further assessment
