

# Raising and Escalating Concerns: Pathway for Resident Doctors

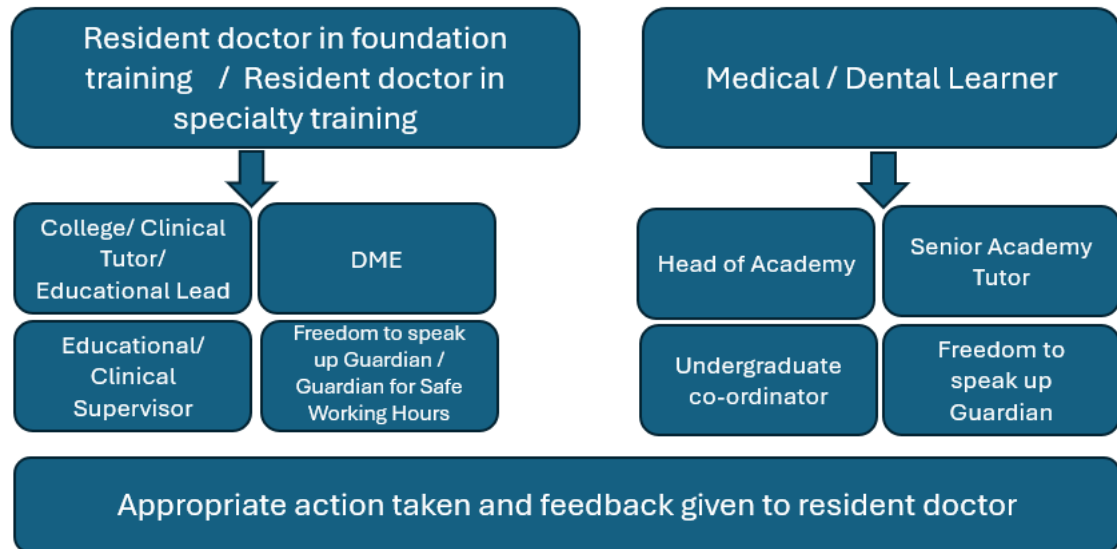

NB. There is a separate pathway for other clinical professions

It is important that Healthcare Learners are able to raise and where appropriate escalate concerns.

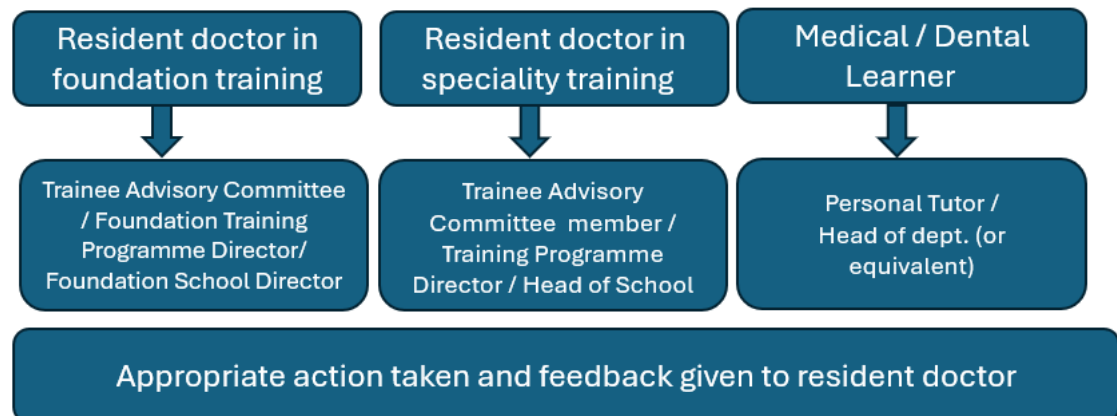

This flow chart highlights the ways in which you can do this. You are encouraged to follow the appropriate pathway, starting with reporting the concern within your clinical learning environment in the first instance. For further information please contact the Quality Team at [england.quality.tv@nhs.net](mailto:england.quality.tv@nhs.net)

**Please note: This process is not intended to replace local Serious Incident reporting**

**Pathway 1: Clinical Learning Environment – Use this approach in the first instance.**

**Pathway 2: If you are unable to report the concern to the clinical learning environment or continue to be concerned then please use this pathway**

**Pathway 3: If you have tried pathways 1 & 2 and continue to be concerned, contact the Multi-professional Dean who has responsibility for the quality of education and training within the learning environment.**
